

I'M WRITING IN REFERENCE to satelittle radio. I am tired of the government taking my amendment rights away. They tell us what we can see on TV. And now what we can hear on the radio. The NAB petition is wrong we should be able to listen to the weather and traffic on the satatlite radio. I never listen to regular radio because all it is is commercails. So with living in Oklahoma I should be able to be kept informed with what is going on. I am 52 years old and can make up my mind on what to listen to and what to watch on TV.
